Geological Survey of Canada, Current Research (Online) no. 2000-C20 Neil T. Pettigrew, 2000 The Samuels Lake intrusion is an elliptical body about 600 by 300 metres located about halfway between Atikokan and Rainy Lake in north-west Ontario. The intrusion is similar to an array of mafic-ultramafic intrusions east of Atikokan called the Quetico Intrusions, and contains platinum group element (PGE) mineralization associated with the occurrence of sulphides, especially chalcopyrite. This report describes the lithology of the four distinct igneous phases of the intrusion, its structure, and its sulphide & PGE mineralization. Similarities with & differences between the Quetico Intrusions are noted.

Handbook of Naturally Occurring Compounds T.K. Devon, 2012-12-02 Handbook of Naturally Occurring Compounds, Volume II: Terpenes is a handbook of naturally occurring compounds to which structures have been assigned, with particular reference to terpenes. Each structure is stored in the handbook with its name, molecular formula, molecular weight, optical rotation, melting point, literature reference, and classification number. Comprised of 10 chapters, this volume begins with an overview of terpenes and their classification schemes, followed by terpenoid classes and their structural/biogenetic categories as well as skeletons: monoterpenes, sesquiterpenes, diterpenes, sesterterpenes, triterpenes, steroids, carotenoids, and polyprenoids. Miscellaneous compounds of terpenoid origin are also considered, including the ionones and fraxinellone. This final category for miscellaneous compounds of terpenoid origin arises through the somewhat frequent occurrence of oxidative degradation in terpenoid biosynthesis. In general these compounds have degraded structures such that there exists some ambiguity as to their precise biosynthetic precursors. Each individual compound possesses a compound sequence number which, in combination with the Classification Code Number, supplies a unique address for that compound. This book should be a valuable resource for chemists as well as students and researchers of chemistry.

The first chapter is devoted to the long-range order in biomembranes. This chapter presents evidence that the proteins and lipids of biological membranes are partitioned into functional and structural aggregates in the plane of the membrane. The second chapter surveys the pharmacology and toxicology of steroids and related compounds. This chapter also provides the methodology, physiologic and transport mechanisms, and effects on the central nervous system. The third chapter explores all aspects of lipid composition of all classes of fungi. This chapter also discusses the intracellular distribution and biosynthesis of the lipid components of fungi.
